

Below is a list of GPS tracking devices for kids with special needs or seniors with dementia. There are many different products/devices available for caregivers to use to track individuals who wander. The OCSO recommends caregivers do their own research and pick the company/ product that works best for their family. The devices below are not in any specific order.

Some inexpensive items are **Apple Air Tags and holders, Sumsug Galaxy SmartTag 2, and Tile by Life 360 Mate 2024**
